

Power Standard #6

Liter - A metric unit that is used to measure capacity

Gram - A metric unit that is used to measure weight

Meter - A metric unit that is used to measure lengths or distances

**Metric System - A system of measurement that uses decimals and is based on liters, grams, and meters.
(Remember: King Henry Died Unexpectedly Drinking Chocolate Milk).**

U.S. Customary - A system of measurement used by the United States that is not based on decimals.
