

# Power Standard #7

**Polygon** - A flat, 2-dimensional shape with straight sides and no openings.

**Quadrilateral** - A flat, 2-dimensional shape with 4 straight sides.

**Parallel** - Lines (sides) that are always the same distance apart and never touch.

**Perpendicular** - Lines (sides) that intersect and form  $90^\circ$  angles.

**Adjacent** - Two lines (sides) that lie next to each other and meet at a common vertex.

**Congruent** - Lines and angles that are the same length or degree.
